

# ECOLOGICAL RESTORATION SERVICES

Ecological restoration is one of many tools that can bring people and the environment back into balance by offsetting unavoidable project impacts and restoring finite ecological resources and functions. SWCA's ecological restoration services include post-construction revegetation, reforestation, erosion control, stream and wetland mitigation permitting, design and implementation, coastal restoration, invasive species management, habitat improvement, management, and species conservation banking, pollinator habitat restoration/enhancement, aesthetic improvements, post-fire restoration, and much more.

## WHY CHOOSE SWCA?

- **We have a dedicated ecological restoration and engineering team** that plans, designs, permits, builds, and monitors environmental restoration projects.
- **We have the regulatory expertise and the agency relationships** throughout the United States to guide successful restoration projects from inception to completion.
- **Our team pioneered native habitat restoration from coastal marshes to mountain habitats**, and we have developed expertise and success in restoring a range of difficult sites from contaminated wetlands, degraded streams, rivers and lakes, mining operations, and steep failed slopes.
- **With a strong track record of approvals and successfully implemented projects**, our team will help you achieve swift issuance of any required permits/approvals to move your project forward from beginning to end.

## SERVICES

- Stream and Wetland Mitigation Banking
- Stream and Wetland Restoration Design / Engineering
- Design / Build Restoration
- Living Shoreline Design
- Stream Restoration
- Wetland Restoration
- Restoration Construction Oversight
- Sustainable Watershed Management
- Fisheries and Wildlife Habitat Restoration and Enhancement
- Erosion Control
- Pond, Lake, and River Management Plans
- Algae and Nutrient Removal
- Water Clarification
- Bank Stabilization
- Coastal / Marine Restoration
- Dune Restoration
- Prairie and Grassland Restoration
- Post-Fire Restoration
- Invasive Species Management
- Soil Sampling & Analysis
- Topsoil Salvage Planning
- Seed Mix Prescriptions and Pollinator Enhancement
- Soil Resource Assessment
- Soil Remediation Prescription
- Soil Survey and Delineation
